PROFILE

Senior UX/UI Designer with extensive experience in interface design and Design Systems for banking, fintech, pharma and enterprise environments. Advanced in Figma (variables, properties, Auto Layout, design tokens), with hands-on experience in information architecture, prototyping and accessibility (WCAG). A hybrid profile that takes design all the way to code: expert in HTML, CSS/SASS (BEM) and front-end implementation with Angular (PrimeNG) and React, focused on reusable components and seamless collaboration between design, product and development.

KEY SKILLS

UX/UI design	Information architecture	Prototyping	WCAG accessibility
Multi-brand Design Systems	Figma & Adobe CC	Hybrid profile: design + front-end	
MCP integration: Figma → code	AI-assisted UI design	AI-generated images & infographics	

AI & AUTOMATION

AI integrated into UX/UI design and Design Systems work: MCP with Figma for token export, AI-assisted development with Claude Code and Cursor, generation of images, graphics and infographics, and advanced use of language models (ChatGPT, Claude, Gemini), always reviewing and adapting the output to each project's standards.

PROFESSIONAL EXPERIENCE

Senior UI Engineer 2023 - 2026

Inercya Intelligent Software

Clients: AEDAS, Pfizer, Abbott, AbbVie (real estate and pharma)

- Designed and built a multi-brand Design System, defining specifications, primitives, components and design tokens for different clients.
- Designed UX/UI interfaces and experiences in Figma and Adobe for corporate and private client portals, nationally and internationally.
- Defined UX/UI standards and visual consistency guidelines, improving design cohesion across multiple projects.
- Brought MCP and AI assistants into the Design → Development workflow for token export, reducing friction between teams.
- Worked in multidisciplinary teams of up to 10 people, aligning UX/UI implementation with business requirements.

Design Team Coordinator 2022 - 2023

Mindata

Client: Riu Hotels (Resorts & Hotels)

- Led the UI/UX team in the corporate web environment, organizing workflows and task tracking.
- Aligned design, business and development requirements by applying the BEM methodology and building web components.
- Ensured quality and consistency of deliverables through regular design reviews, leading to fewer iterations and higher stakeholder approval.

Senior UI Engineer / UX 2022

Hiberus

Client: RTVE (high-traffic digital platform)

- Applied interface architecture criteria focused on visual consistency.
- Developed responsive interfaces for RTVE, taking design to code.
- Implemented accessible interfaces, improving code reuse and meeting WCAG standards.
- Worked with Agile teams delivering web components, accelerating release cycles.

Senior UI Engineer

2015 - 2022

GFT Technologies

Digital Transformation for BBVA (corporate Design System) · Madrid and London

- Six years on BBVA projects (Design Spain and Enterprise Global Solutions), contributing to the corporate Design System during the full brand redesign.
- Designed and maintained the design system in Figma and Adobe (components and prototypes), speeding up UI delivery and reducing friction in the design-to-development handoff.
- Applied WCAG accessibility criteria: semantic HTML, keyboard navigation and visual accessibility across interfaces and components.
- Introduced BEM naming conventions, best practices and code review processes that reduced interface defects.
- Other clients: Inditex, Bankia, Deutsche Bank, Banco Sabadell and Repsol, working with ReactJS and Storybook.

Senior Front-End Developer & UX Design

2015

Alten Spain

- Built the new CANAL+ corporate portal, turning designs into responsive web interfaces.

Senior Front-End Developer & UX Design

2013 - 2014

MoneyGurú & Capitalis

- Led a 3-person UI team developing the group's websites and landing pages.
- Prioritized features, defended product decisions and validated results after launch.
- Contributed to rebranding and user experience projects for a Brazil-based organization.

Web Developer

2010 - 2013

Professional Services

- Designed and developed UI for a range of IT projects, turning product needs and UX designs into web implementations.

Previous experience

TasGroup Iberia and earlier roles

- Front-end development and interactive content, contributing to web architecture, design and HMI communication.

TECHNICAL SKILLS

UX/UI design: Figma (variables, properties, Auto Layout), FigJam, information architecture, prototyping, responsive design, Adobe Creative Cloud, Sketch

UI & Design Systems: design tokens and primitives, components and UI Kits, Storybook, accessibility (WCAG)

Front-end: HTML5, semantic HTML, CSS3, SASS/SCSS, Tailwind CSS, BEM, OOCSS, SMACSS, JavaScript, Angular, PrimeNG, ReactJS, Web Components

AI tools: MCP (Figma), Claude Code, Cursor, ChatGPT, Claude, Gemini

Tools: Git, GitHub, GitLab, Jira, Miro, Trello, OpenProject

Methodologies: Agile, Scrum

EDUCATION

Multimedia Content Specialist University of Córdoba

Degree in Applied Arts Córdoba School of Art
